

Designing interventions to encourage
behaviour change (in the context of Lyme
disease)

Lyme disease: Highland

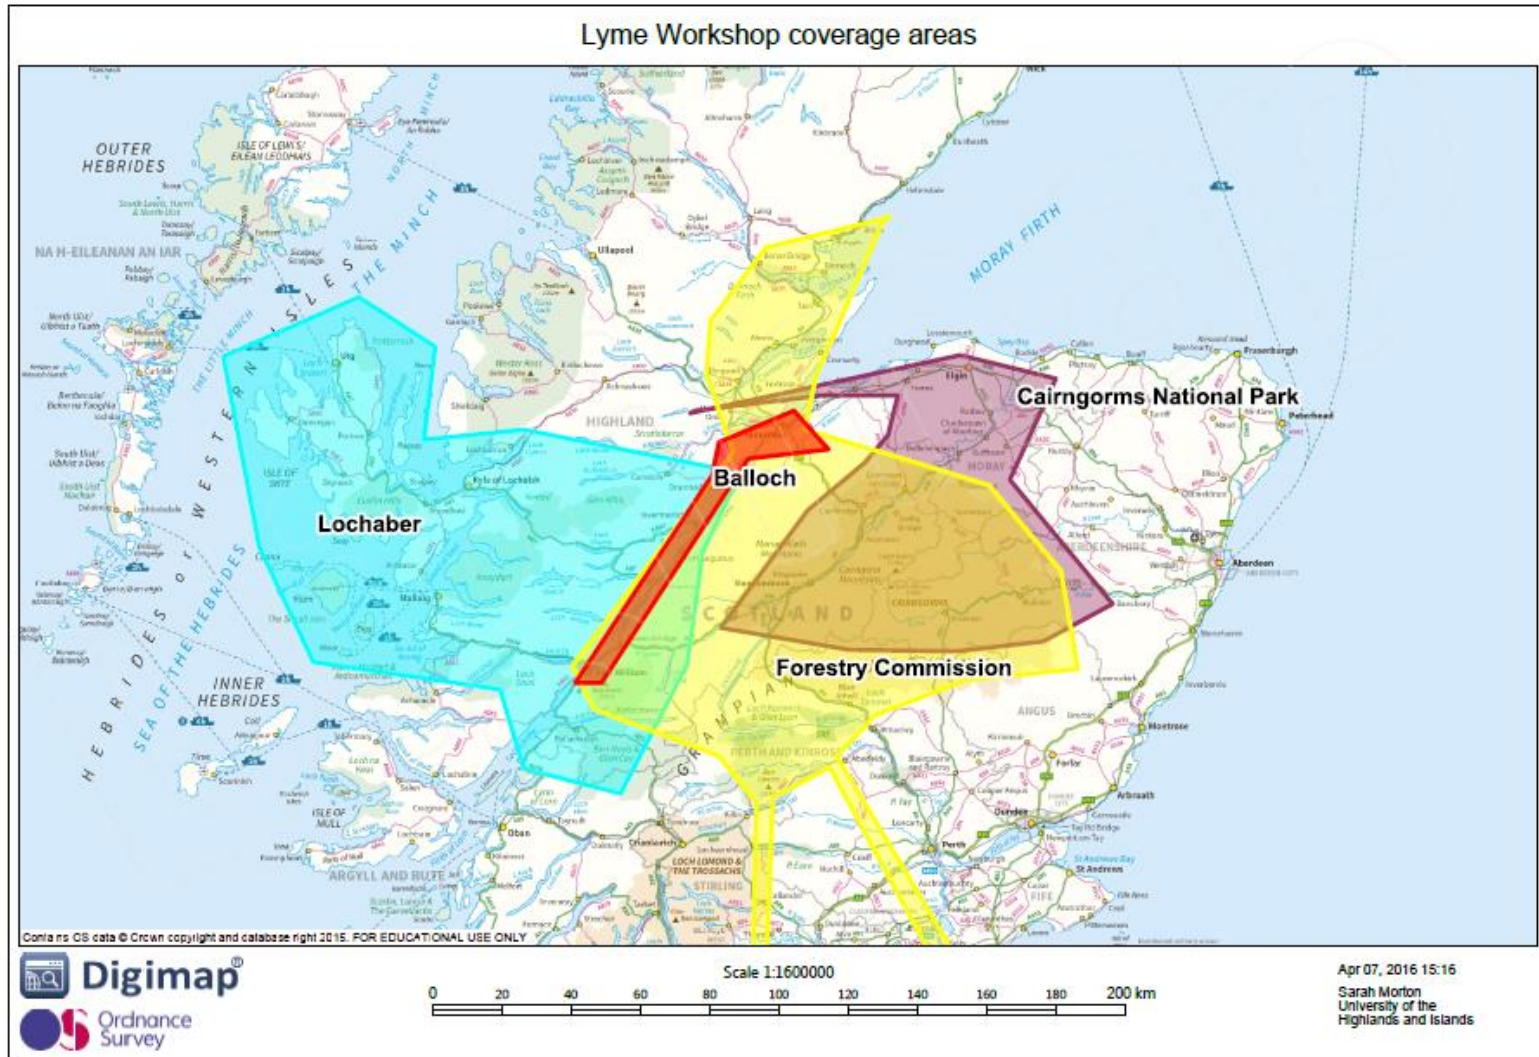

- Incidence rate (based on seropositive cases) within Highlands = 44.1 cases per 100 000 (2013)
- Case data = based on patient postcode information; not where tick bite occurred
- Anecdotal reports suggest: anticipated underreported figure = 5 – 10 times below true number of treated cases
- To get a real picture of incidence: correlate clinical data with lab data

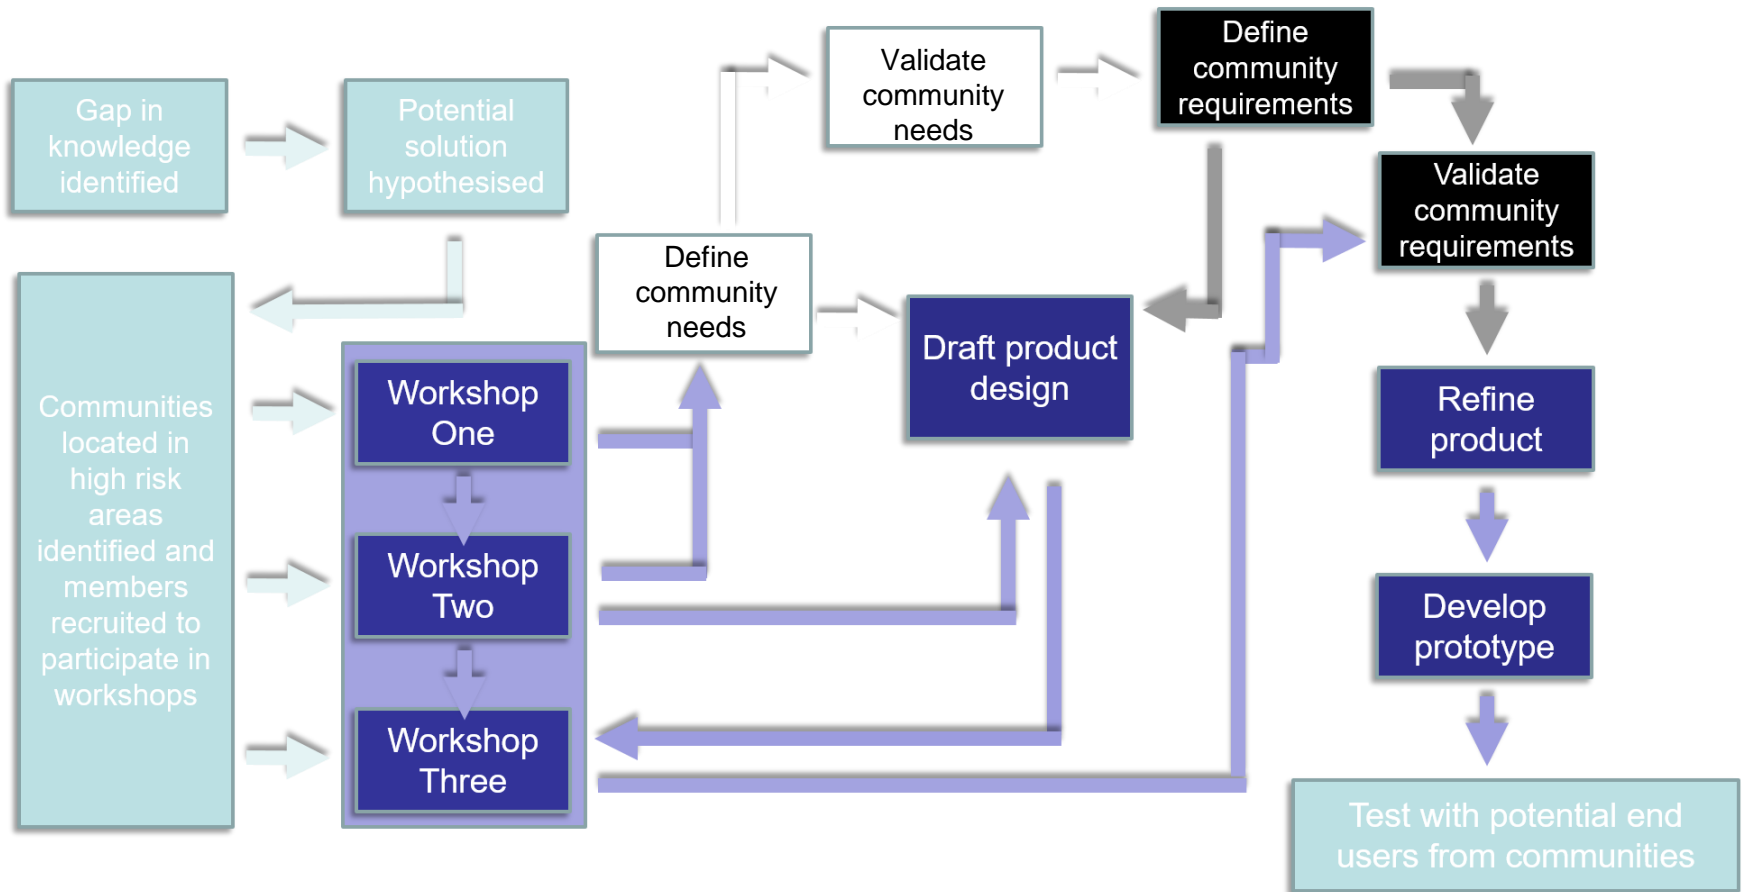

(Source: Mavin et al., 2015)

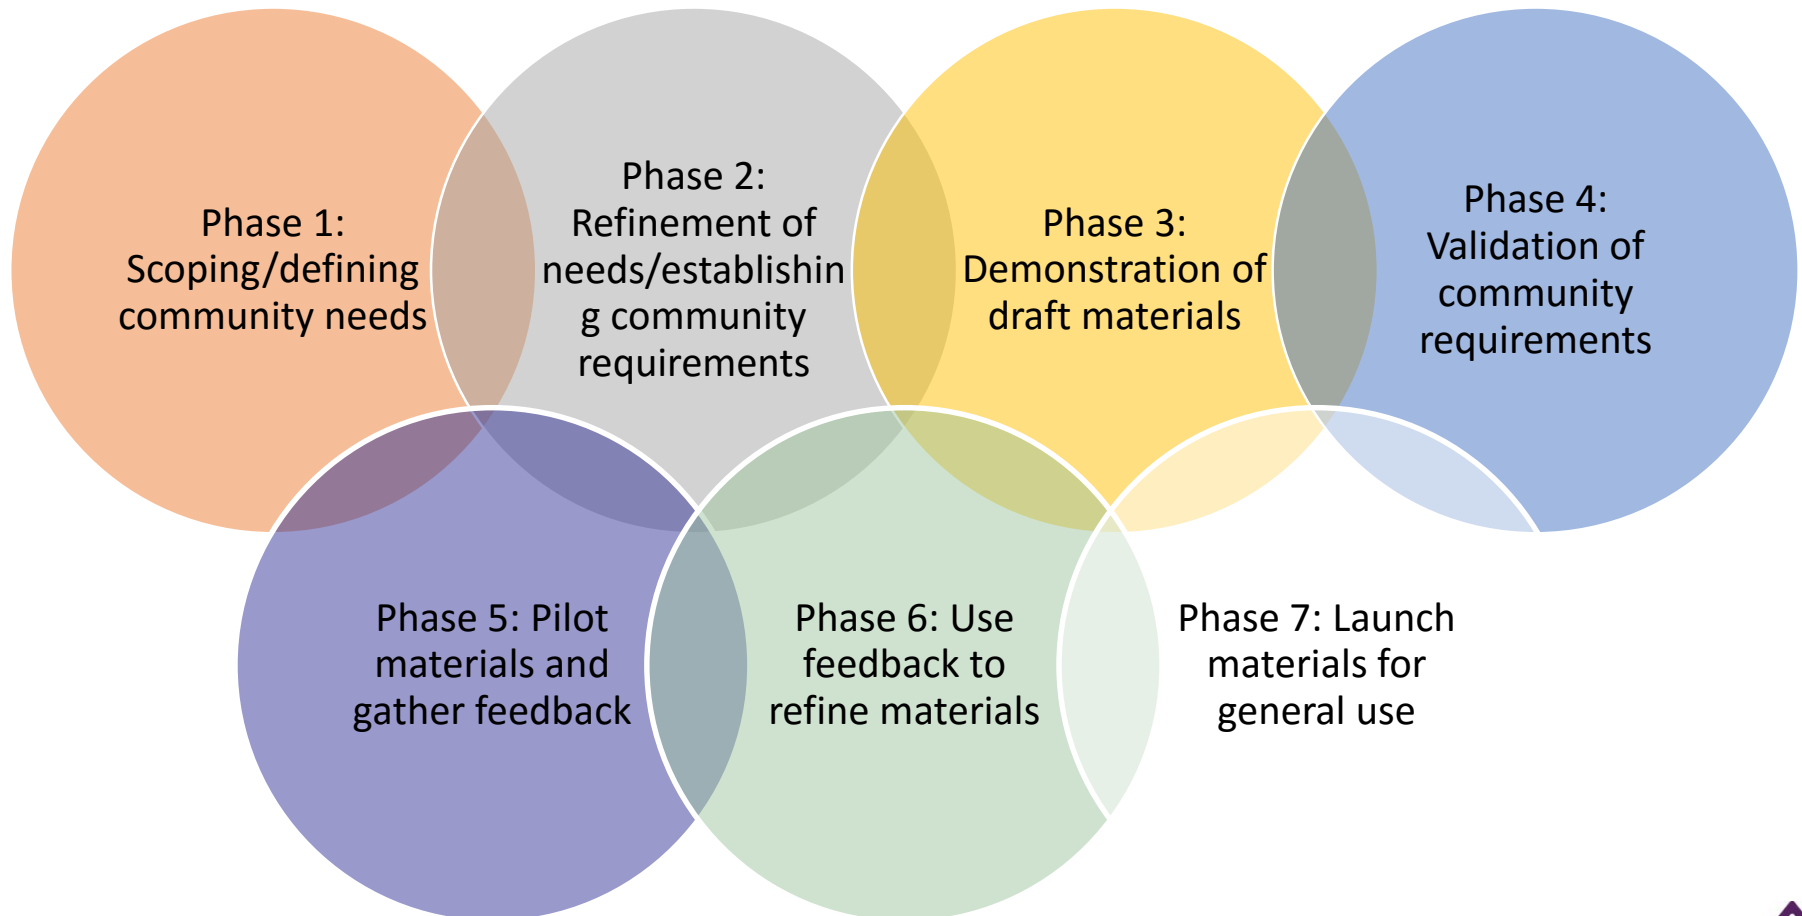

Community engagement

Co-design process

Overview of process

Our findings

What is needed:

- Good advice, that can be relied upon
- Awareness raising information – firstly, about ticks and avoiding tick bites, and secondly, about Lyme disease
- Risks highlighted in a manner that does not cause alarm – especially for those with less awareness, and potential to be dissuaded from using outdoors spaces
- Information to arm users of outdoors spaces with the necessary details, without overwhelming them

Key messages to communicate:

- Check for ticks following potential exposure
- Don't spoil the fun of being in outdoors spaces

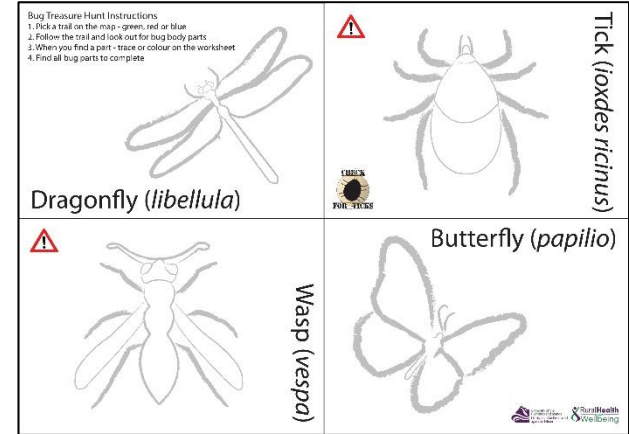

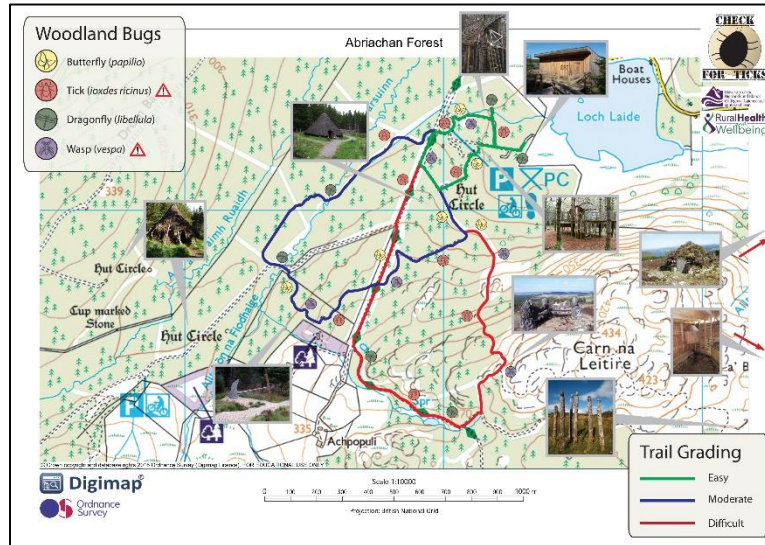

Risk mitigation materials

Tick check cards

Bug treasure hunt

Feedback and future development

Feedback:

- “This website is both user friendly and very informative.” (f, 46, Inverness)
- “The materials are very good and have been adapted for multiple target audiences, which is great. I am looking forward to seeing how this progresses.” (m, 26, Black Isle)
- “Difficult to find a balance between being aware and not creating panic, but you seem to have done it. These excellent materials need to be more widely promoted.” (m, 56, Cairngorms National Park)
- “The website gives the essential information I need.” (f, 58, Black Isle)
- “Excellent website! I’ll recommend it to others in the future. Looking forward to doing the bug hunt with my nephew.” (f, 34, Skye)

Future development:

- Online toolkit-style resource
- Bug treasure hunt in augmented reality game format for smartphones

Thank you.
